Professional Summary

Seasoned Full-Stack Developer with 6+ years of experience in web applications, software architecture, and team leadership. Expert in Agile methodologies, delivering 10+ high-impact projects from concept to launch across E-commerce, CMS, and AI/ML domains. Proven track record in optimizing cloud infrastructure, serverless solutions for deployments, leading migrations, and managing end-to-end product lifecycles.

Technical Skills Matrix

Category	Technologies & Tools
Languages	Python, JavaScript, TypeScript, PHP, SQL, HTML, CSS, JSON, Kotlin, MQL, XML
Frameworks & Libraries	React, Next.js, Flask, Django, Node.js, Vue.js, Chalice, Laravel, Magento 2.x, WordPress, Tailwind, SaSS, Less, jQuery, Three.js, Vite, Zend, .NET
Tools & DevOps	AWS (VPC, Subnet, S3, EC2, Lambda, IAM, CloudFormation, SQS, CloudWatch), Kubernetes (EKS), Docker, Git, Jenkins,

Category	Technologies & Tools
	Postman, Redis, Nginx, Varnish, Gunicorn, Composer, Poetry, Selenium Grid, Xdebug
Databases	MySQL, PostgreSQL, MongoDB, Oracle (10g/11g/12c)
Concepts	Microservices, REST APIs, GraphQL, Webhooks, Design Patterns, Agile (Scrum/Kanban), Machine Learning, Artificial Intelligence, SEO Optimization, OMS/RMA Integration, SOAP, MVC, MVVM

Professional Experience

RAD Ole Pvt. Ltd. (ole-solutions.com), Mumbai

Senior Software Engineer & Team Lead | Jun 2023 – Jun 2026

Key Technologies: Python, AWS (EKS, Lambda, EC2, SQS, CloudWatch, S3, VPC, Subnets, SG, IGW), Kubernetes (EKS, K8S), Docker, Flask, Node.js, ReactJS, Vue.js, Redis, Three.js, Stable Diffusion, pandas, numpy, Jenkins CI/CD, Poetry, Git, MySQL, MongoDB, Laravel, PHP8, PHP, Nginx, Gunicorn, Composer, Selenium Grid.

Core Expertise: Software Architecture & Design, API Development (REST/Webhooks), Microservices.

- Drove technical execution with a primary focus on Python and its data libraries (pandas, NumPy) for application logic, automation, and data processing, alongside extensive SQL implementation.
- Led multiple projects from conception to deployment, overseeing both new builds and complex maintenance cycles.

- Defined sprint timelines and managed cross-functional task allocation via Scrum/Kanban methodologies.
- Introduced Git-based version control protocols and established DevOps best practices within the engineering team.
- Acted as Solution Architect and quality assessment lead, ensuring scalable infrastructure for rapid startup growth.
- Implemented serverless solutions for erps

Forbes Advisor, Mumbai

Software Engineer | Dec 2021 – Jun 2023

Key Technologies: PHP 8, Laravel, Vue.js, Node.js, WordPress, APIs, MySQL, Git, Composer, PHP 7.

Core Expertise: API Development, Performance Optimization, Database Design.

- Provided comprehensive software solutions by creating, modifying, and optimizing high-traffic features, APIs, and reporting tools.
- Managed the end-to-end migration and upgrade of core projects to PHP 8, improving performance and security.
- Contributed to major global sites including Advisor (Global), Health, Wheels, and Home Improvement.
- Automated content updates and optimized site performance metrics to achieve faster load times across diverse verticals.

Ambab Infotech Pvt. Ltd., Mumbai

Software Engineer | Jun 2019 – Nov 2021

Key Technologies: Python, Flask, JavaScript, Node.js, ReactJS, TypeScript, Magento 2.x, PHP, APIs, Docker, Git, Jenkins, MySQL, NGINX, Varnish, Algolia, Postman, Xdebug, Composer, Zend, Bootstrap, Sass, Less, Design Patterns, SDLC, OMS/RMA Integration.

Core Expertise: Backend Architecture, API Development (REST/SOAP), Design Patterns, SDLC.

- Focused on backend architecture using Magento 2.x for global e-commerce enterprise brands.
- Developed custom modules, service extensions, and integrated secure payment gateways.
- Participated in the full Software Development Life Cycle (SDLC) within high-velocity Agile teams.

Exhaustive Projects List

High-Impact Engineering Projects

Python/Flask ERP & Shopify Automation

Company: RAD Ole Pvt. Ltd.

- **Impact:** End-to-End Product Lifecycle & Scale Synchronization.
- **Description:** Python/Flask-based ERP for automated product ingestion via UI/CSV, featuring flexible margin management and complex Shopify synchronization.
- **Tech:** Python, Flask, GraphQL, MQL, AWS (EC2, SQS, Lambda, CloudWatch), MongoDB, Nginx, Gunicorn, Selenium, JSON, jQuery, HTML, CSS.
- **Highlights:** Architected an automated image generation engine using Selenium to render canvas-based 3D links; used serverless solution for erp events, engineered sync logic to group variables exceeding Shopify's variant limits; managed persistent product state and inventory across both platforms.

Ole Dyo (Widget Product) / Ole Webstudio

Company: RAD Ole Pvt. Ltd.

- **Impact:** Multi-client Deployment (5+).
- **Description:** A widget-based ring customization product supporting the full order journey with 3D canvas integration. Also served as an E-service website and SaaS platform.

- **Tech:** React, TypeScript, Vue.js, Node.js, K8S, Docker, Redis, AWS (S3, EC2, EKS), Laravel, PHP8, MySQL, Tailwind, MVC, Composer, Varnish, Xdebug, JSON, HTML, CSS, PHP.
- **Roles & Responsibilities:** Engineered core platform features, including payment gateway integration and subscription management; collaborated with stakeholders to design a seamless SaaS platform with custom metered subscriptions; played a key role in software maintenance and architectural improvements for enhanced scalability.
- **Highlights:** Developed a customizable widget integrated into client sites with full admin control and real-time 3D visualization; implemented custom metered subscription plans; designed and deployed a hybrid architecture; developed transaction recording mechanisms for credit and service usage.

Ole DYO for Grownbrilliance (EKS Migration)

Company: RAD Ole Pvt. Ltd.

- **Impact:** Zero-Downtime Migration & Risk Mitigation.
- **Description:** Architectured and executed the migration of a mission-critical application from an End-of-Life (EOL) EKS version to a modern environment.
- **Tech:** Kubernetes (EKS), AWS (VPC, Subnets, SG, IGW), Docker, Jenkins CI/CD, Xdebug, JSON.
- **Highlights:** Provisioned the entire AWS networking infrastructure from scratch (VPCs, subnets, gateways) and managed the production switch-over to avoid downtime during the AWS support EOL.

Core E-Commerce & Web Development

Von Diamonds (Shopify Plus)

Company: RAD Ole Pvt. Ltd.

- **Impact:** Revenue > $10M.
- **Description:** High-revenue jewelry e-commerce store with custom ERP, 3D product modeling, and CAD-to-image generation.

- **Tech:** Python 3, Flask, Next.js, Express.js, AWS (S3, EC2, SQS, Lambda, IAM, CLI, CloudFormation), Chalice, NGINX, MySQL, MongoDB, JavaScript, Shopify Plus, Liquid, Three.js, JSON, jQuery, HTML, CSS.
- **Roles & Responsibilities:** Designed and implemented a custom ERP for seamless product synchronization; managed client communications; developed innovative features like a swatch solution to showcase additional product options.
- **Highlights:** Integrated 3D view canvas; created custom crontabs for automated imports; implemented a hybrid architecture (microservices/monolithic) for optimal performance.

Von Diamonds - Diamond Feed Tool (Sub-Project)

- **Tech:** Python, Django, Celery, Redis, GraphQL, PostgreSQL, MySQL, pandas, numpy, Shopify, Postman, JSON.
- **Architecture:** Implemented a robust ETL pipeline on Django/Celery, featuring a Producer–Consumer / Task Queue pattern for asynchronous product synchronization.
- **Key Design:** Used Idempotency via hashing for change detection, a Singleton-ish lock via DB row to prevent overlapping syncs, and the Webhook/Observer pattern to decouple event reaction from Shopify.
- **Engineering Excellence:** Leveraged batch processing (bulk operations, pandas DataFrames for set-based diffing) for optimized I/O. Applied Template Method and Strategy/Converter patterns for scalable data ingestion driven by a DRY *headersMap* configuration.

Diamond Chemistry (Shopify)

Company: RAD Ole Pvt. Ltd.

- **Description:** E-commerce maintenance and UI updates; integrated Flask-based ERP and custom jewelry request APIs.
- **Tech:** Python 3, Flask, Next.js, Express.js, AWS (S3, EC2, Lambda, IAM, CLI, SQS, Cloudwatch), Chalice, NGINX, MongoDB, JavaScript, Git, Shopify, Liquid, Three.js, JSON, jQuery, HTML, CSS.

- **Roles & Responsibilities:** Spearheaded UI updates, maintenance, and architectural enhancements; led the design and deployment of a custom ERP system; developed interfaces and APIs for custom jewelry requests (including CAD-to-image generation).
- **Highlights:** Delivered a hybrid architecture (microservices/monolithic); customized invoice PDFs; solved diverse compatibility and bug issues across sub-services.

Dream Diamonds (Shopify)

Company: RAD Ole Pvt. Ltd.

- **Description:** Shopify site; included complete UI updates, maintenance, and deployment of a custom ERP system for product synchronization.
- **Tech:** Python 3, Flask, Next.js, Express.js, AWS (S3, EC2, SQS, Lambda, IAM, CLI, Cloudwatch), Chalice, NGINX, MongoDB, JavaScript, Shopify, Liquid, Three.js, JSON, jQuery, HTML, CSS.
- **Roles & Responsibilities:** Managed complete UI updates; spearheaded custom ERP design/deployment (including CAD-to-image generation features); collaborated with clients to deliver tailored solutions.
- **Highlights:** Replaced entire product catalogs within 20 working days due to vendor transition; integrated a 3D view canvas for enhanced user interactivity; optimized SEO and resolved compatibility issues.

Alfa [Harvey Nichols] (E-commerce & Mobile App)

Company: Ambab Infotech Pvt. Ltd.

- **Impact:** 60% Load Time Improvement.
- **Description:** Multilingual e-commerce site and mobile application with full-stack maintenance and API development.
- **Tech:** Python, Flask, Docker, Jenkins, AWS EC2, Magento 2.3, PHP7, MySQL, Algolia, MVC, MVVM, Postman, Xdebug, Git, NGINX, Varnish, Zend, Composer, Bootstrap, Less, JSON, XML, jQuery, HTML, CSS.
- **Roles & Responsibilities:** Worked as a Full-Stack Developer (primarily backend); led efforts in API development for seamless mobile application integration; collaborated with the client for product requirements.

- **Highlights:** Designed a custom token system for securing mobile APIs; integrated RMA and OMS solutions to streamline logistics; helped create store-wise themes for multilingual experience; implemented Algolia integration, resulting in a 60% improvement in load times.

Forbes Advisor Verticals (CMS Websites)

Company: Forbes Advisor

- **Description:** Large-scale global CMS project involving multiple independent sites (Advisor, Health, Wheels, Home Improvement); responsible for custom widgets, APIs, and PHP upgrades.
- **Tech:** Laravel, Vue.js, Node.js, PHP8, WordPress, MySQL, Tailwind, MVC, Postman, Xdebug, Git, Composer, JSON, jQuery, HTML, CSS, PHP7.
- **Roles & Responsibilities:** Contributed as a backend developer in a large, cross-functional team (26+ members); enhanced user experience and site performance through systematic debugging and optimization.
- **Highlights:** Created custom post types, pages, and widgets; automated bulk updates of posts and implemented SEO optimizations; developed APIs for third-party widget integrations; optimized code and queries, upgrading websites to PHP 8 compatibility.

Cynergy - Bespoke (Multi-Agent Sales Platform)

Company: RAD Ole Pvt. Ltd.

- **Description:** Multi-agent sales platform for custom rings, allowing retailers to curate storefronts and manage orders without integrated payment services.
- **Tech:** Laravel, Vue, AWS, PHP, MySQL, MVC, Xdebug, Git, Vite, Three.js, JSON, HTML, CSS.
- **Roles & Responsibilities:** Led the project from conception to deployment; designed the system where customers pay retailers directly and retailers remit the base price to the vendor; enabled vendor/retailer configuration of products and margin factors.

- **Highlights:** Delivered a decoupled order processing platform, enhancing operational transparency; empowered vendors and retailers with customizable product management; engineered automated email notification system.

Image Generation | Stable Diffusion, Python, Flask

Company: RAD Ole Pvt. Ltd.

- **Description:** Developed a REST API and application for image generation using DALL-E and Stable Diffusion, including custom model training capabilities, with a focus on **Generative AI** (Gen AI) and **Machine Learning** (ML).
- **Tech:** Python, Flask, Stable Diffusion, Docker, Git, Poetry, JSON.
- **Roles & Responsibilities:** Designed and implemented a REST API for image generation; collaborated on training models for specific image types; ensured seamless deployment and maintenance.
- **Highlights:** Developed functionality to generate images via API services like DALL-E and Stable Diffusion; facilitated custom training of models to cater to unique image generation requirements.

Webstudio

Company: RAD Ole Pvt. Ltd.

- **Description:** Tool for generating images/videos from CAD files; reduced company AWS costs by 80% via demand-based Selenium nodes.
- **Tech:** Python, AWS, boto 3, Selenium Grid, JSON.

360 Inex (Lightweight E-commerce)

Company: Ambab Infotech Pvt. Ltd.

- **Description:** Lightweight e-commerce site delivered within a tight 6-week timeline with a focus on quick user flows.
- **Tech:** Magento 2.3, Docker, Jenkins, AWS EC2, PHP7, MySQL, Algolia, MVC, MVVM, Postman, Xdebug, Git, NGINX, Varnish, Zend, Composer, Bootstrap, Less, JSON, jQuery, HTML, CSS.

- **Roles & Responsibilities:** Delivered a fully functional platform within 6 weeks; designed and implemented one-click checkout and payment gateway integration; customized product listing pages.
- **Highlights:** Integrated Algolia for enhanced product search functionality; built custom cookies for personalized user experiences; optimized website performance and functionality using advanced caching techniques.

Hoshan (B2B E-commerce)

Company: Ambab Infotech Pvt. Ltd.

- **Description:** B2B e-commerce platform with custom service extensions and Google Maps integration.
- **Tech:** Reactjs, TypeScript, Magento Headless, Node.js, GraphQL, Docker, Jenkins, Magento 2.4, PHP7, MySQL, MVC, MVVM, Postman, Xdebug, Git, NGINX, Varnish, Zend, Composer, Bootstrap, JSON, jQuery, HTML, CSS.
- **Roles & Responsibilities:** Led backend development efforts, focusing on customizing products and services for a B2B platform; managed project setup.
- **Highlights:** Implemented a service extension feature allowing users to raise and track service requests from 'my account'; integrated Google Maps; used Magento's content security framework for third-party APIs.

Metro Shoes (E-commerce Maintenance)

Company: Ambab Infotech Pvt. Ltd.

- **Description:** Maintenance project focused on SEO improvements and custom feature development during a temporary assignment.
- **Tech:** Magento 2.4, Docker, Jenkins, PHP7, MySQL, MVC, MVVM, Postman, Xdebug, Git, NGINX, Varnish, Zend, Composer, Bootstrap, Sass, JSON, jQuery, HTML, CSS.
- **Roles & Responsibilities:** Temporarily managed backend responsibilities during a maintenance phase; focused on improving SEO and developing custom solutions.
- **Highlights:** Updated and added meta tags, significantly improving the site's SEO score; created a custom module to display top-selling products by category.

Prisma (E-commerce Upgrade)

Company: Ambab Infotech Pvt. Ltd.

- **Description:** E-commerce website upgrade and theme modification; responsible for full-stack maintenance and project setup.
- **Tech:** Magento 2.2, Docker, Jenkins, AWS EC2, PHP7, MySQL, MVC, MVVM, Postman, Xdebug, Git, NGINX, Varnish, Zend, Composer, Bootstrap, Sass, JSON, jQuery, HTML, CSS.
- **Roles & Responsibilities:** Served as the sole backend developer; upgraded the existing website and theme; managed the entire project setup and maintenance.
- **Highlights:** Upgraded Magento version, reducing security vulnerabilities by 30%; modified the theme based on client requests; developed custom features like a gallery magnifier and logistics integration.

Ontime (UAE E-commerce)

Company: Ambab Infotech Pvt. Ltd.

- **Description:** UAE e-commerce website; full-stack maintenance and campaign support during campaigns.
- **Tech:** Magento 2.2, APIs, Docker, Jenkins, PHP7, MySQL, MVC, MVVM, Postman, Xdebug, Git, NGINX, Varnish, Zend, Composer, Bootstrap, Sass, JSON, jQuery, HTML, CSS, PHP.

Education

BE - Information Technology

University of Mumbai | May 2017

Score: 60% / 5.97 CGPI

Class XII HSC (Science)

Maharashtra Board | Mar 2012

Score: 80%

Class X SSC

Maharashtra Board | Mar 2010

Score: 83%

Additional Information

- **Coursework:** Completed the Prognoz Technical Competency Program on .NET Technology (C# Programming) at Prognoz Technologies Pvt. Ltd. (June – August 2014).
- **Languages:** English, Hindi, Marathi.
- **Internship:** DIT & STC POWAI (Union Bank of India) - Mobile application (developed using Android Studio and Kotlin) and backend service development.
